& SUPPLY CHAIN MANAGEMENT

COURSE BROCHURE

Course Overview

Our Procurement, Logistics and Supply Chain Management course provides delegates knowledge on how products and services are sourced, manufactured, delivered, and returned, including contracts and relationships management with suppliers. It elaborates on the approach to Procurement Management through analysis of the Procurement Cycle (Sourcing, Negotiating, Purchasing, Acquisition) from the view of both Buyers and Suppliers, including the flow, key models, drivers, metrics, and benchmark of the Supply Chain.

Procurement, Logistics and Supply Chain training is important for organizations because, “Procurement is usually responsible for up to 70% of business revenue”, according to Chartered Institute of Procurement & Supply (CIPS), UK, so little cost reductions can have large impact on profits.
